Blockaviation

Media information

Key information:

- Headquarters in Dublin, Ireland.

- Founders: John Roberts (LinkedIn), Simon Mullaney (LinkedIn), Karl Scanlon (LinkedIn)

- Took part in the Propeller Shannon accelerator sponsored by Boeing, Datalex, Enterprise Ireland and the IAA.

- Selected as one of ten from over 740 companies worldwide to take part in Barclays Techstars accelerator. The most prestigious accelerator in Europe.

- New Co-Founder Karl Scanlon, previous founder and owner of Waviatech, which was acquired by AerData in 2010 and subsequently acquired by Boeing in 2014. The Boeing/AerData STREAM platform is the largest electronic aircraft records platform by market share, with close to a billion maintenance documents captured to date. Karl was one of the original contributors to the ATA Spec. 2500 standard, upon which our solutions are based.

- Selected as both an Enterprise Ireland and an Oracle High Performance Startup.

About us:

Our mission at **Blockaviation** is to create a central, standardised Global Registry for aircraft records. One place where industry applications can come to interact with all aircraft records.
